F973(L)

SUPERIOR MONITOR WITH ADVANCED SCREEN TECHNOLOGY AND 12 MS RESPONSE TIME

The F973(L) offers CTX's advanced screen technology for the best picture quality to date. The 19" monitor also boasts even faster response time than its 17" counterpart, – only 12 milliseconds. These two factors make it ideal for viewing fast-paced computer games with advanced graphics.

CTX's Neon-Life Visual Technology, used in the F-series, offers brighter colours and contrast, more detailed pictures and the ability to adapt to different picture modes for a truer display.

The F973(L) is cased in a sleek chassis designed by Just Blue, the German design agency behind the Hugo Boss bottle. It has been specifically designed for home-users that are looking for the most superior monitor available.
